

Siembra Nebraska Summer Internship Programs

Providing youth with valuable work experience while addressing issues in the community.

Growing Careers

Through this summer internship program, students have the opportunity to work for organizations and businesses that align with the intern's career interest. This allows the intern to better understand their future career choice and allows businesses a mentorship opportunity.

Growing Construction

This program aims to prepare students for a smooth transition into the construction industry. Students will develop skills in demolition, remodeling, project management, and more. Interns will also have the opportunity to network with local Construction companies and professionals.

Growing Media

This program places students in the Latino Center of the Midlands Communications department. Interns learn the ins and outs of social media, content creation, videography, public relations, and other skills related to communications and marketing.

Growing Roots

This internship program provides students a hands-on experience in the agriculture industry, both in urban and rural settings. Students are placed at an outdoor or agricultural organization that aligns with their career interests.

Growing Health

Students work alongside the Latino Center's Family and Community Well-Being's Siembra Salud program, and are introduced to the multiple facets of the Public Health field. Qualified students may also have the opportunity to become Certified Nursing Assistants (CNA).
